Abstract

This is a sample document which demonstrates some of the basic features of L^AT_EX. You can easily reformat it for different document or bibliography styles.

1.1 notes

On Jul 23, 2014, at 7:37 PM, Nic Ross <npross@lbl.gov> wrote:

Gang,

In an effort to get our code repository going, here's my github details:
<https://github.com/d80b2t>
<https://github.com/d80b2t/spies>
https://github.com/d80b2t/group_code

So, after creating a repository, you can go to that repository, click settings, and click "collaborators" to add collaborators. I have done this for John and Rob for the https://github.com/d80b2t/group_code repository.

Thanks, Nic

2 git Notes

2.1 To Check-out:

```
> git init  
y > git clone [url]  
e.g.
```

```
> git clone https://github.com/crazygirl9991/SeniorResearch
```

2.2 Status check:

```
> git status
```

2.3 Update your local branch:

```
> git pull
```

2.4 To Add new files/material:

```
> git add  
> git commit -m "[descriptive message]"
```

2.5 To then place on repository:

```
> git push
```

2.6 To check place on repository:

3 Things to learn...

```
git remote add <name> <url>
```
